Over the past few years, the finance industry in the UK has undergone significant changes.				
One notable shift has been towards the increased adoption of financial technology (FinTech)				
solutions. According to a recent report, the number of UK FinTech employees is expected to				
double by 2030, with London being a key hub for this growth.				

Another trend in finance roles has been the emphasis on data analytics and business intelligence. With the abundance of data available, there is a growing need for professionals who can extract valuable insights from it to drive business decisions. Recent trends indicate that nearly 95% of employers in the finance sector plan to increase their investment in data analytics over the next two years.

	CFO	£90,000	£90,000+

The COVID-19 pandemic has had a significant impact on the finance industry, as well. With many businesses facing financial challenges and uncertainty, there has been a heightened focus on risk management and cash flow management. According to a survey by Deloitte, 75% of CFOs in the UK reported that their companies had changed their financial forecasts due to the pandemic.

Despite the challenges of the pandemic, the finance industry in the UK remains resilient. According to data from the Office for National Statistics, the average salary for finance and insurance professionals in the UK is £45,966, with an average annual increase of 2.9%. This reflects the ongoing demand for skilled finance professionals in the UK, and suggests that the industry is well-positioned for continued growth and evolution in the coming years.

Take your career to the next level and gain in-depth insights into the latest Finance and Accountancy trends across the UK.
